Dear Parents and Families

SCHOOL FEES SCHEDULE 2025

The school budget for 2025 was reviewed by the Executive and distributed to the Board of Governors, who approved this fee structure. Our Board members realise that many Veritas families make huge sacrifices for their children to be educated at our school, so it is vital to have a fee structure that is cost effective and competitive, yet able to cover all our expenses, such as maintenance, general running costs, and salaries, bearing in mind that over 73% of our income goes directly towards staff costs. In order to retain our excellent teaching staff and be competitive we need to remain within the ISASA salary scales. It is important to emphasise that our school receives no Government subsidy so our tuition fees must cover all our financial commitments. Both our Board and staff strive to provide educational excellence at an affordable cost to all our families. This allows us to publicise our 2025 fee structure that remains competitive and is lower than many fee structures of other schools in the Independent Schools Network (ISASA)

Matrics: Due to the fact that our Matrics start writing Prelims immediately at the start of the 3rd term and in line with the common practice used in independent schools, the Board has requested that all Matric fees be paid in full by the start of the 3rd term. Parents and families are welcome to start paying Matric fees in 2024 or may opt for the option of paying monthly over 8 months i.e. January to August.

Book Fees: Invoices per grade will be issued for book fees. These fees cover items such as outings, school photographs, school magazine, stationery costs etc. These are unique to each grade. This cost will be added to your school account in January and can be paid monthly along with the school fees. (Please note stationery and text books will only be issued to learners whose current fee payments are up to date)

Compulsory Camps and Outings: These are included in the Book Fees and will be added to your school account.

We now have 4 computer centres, 2 on each campus. Robotics and Coding have been introduced on both campuses. All teachers have upgraded technology and will be equipped with smartboards in their classrooms.
